

This is the Print Aura T-Shirt Template for **OVERSIZED** prints

This file is sized at 14x18, 4200x5400, 300 DPI

About This Template:

Please note this is the template for oversized prints up to 14x18. For standard prints that are 12x16 or less please use our standard template. This size of print is only available for garments large enough for this size to fit so baby, kids and some women's sizes can not support prints of this size.

Getting Started:

1. You must delete this image/layer to ensure it does not appear in your design.
2. Make sure the background of the image is transparent. you should see the grey & white boxes which represent transparency.

Saving Your File:

1. Make sure to merge the layers so there are no font layers or linked files.
2. Save the image as a PDF, PSD, or PNG. Please note we print in CMYK and PNG files can only be saved in RGB so some color accuracy may be lost in files save as PNG.
