

POCKET TEMPLATE

This file is sized at 6".6", 1800x1800, 300 DPI

Getting Started:

1. You must delete this image/layer to ensure it does not appear in your design.
2. Make sure to fill this entire document to ensure your design fully covers the pocket. This template has roughly a 1.5" bleed so some areas won't print and it will depend on the size of the pocket.

We can't guarantee exact placement of your design especially at edges of the pocket. Use images that can be cropped and still look good.

Saving Your File:

1. Make sure to merge the layers so there are no font layers or linked files.
2. Save the image as a PDF, PSD, or PNG. We print in CMYK and PNG files can only be saved in RGB so some color accuracy may be lost in PNG files.
